At boot time this I2C interface will be interrogated to look for an EEPROM. At this time one of the following IDs is sent over the I2C interface:

- ID_CRC-1PF02A

This ID identifies the attached board and allows automagic setup of the GPIOs. Leave unconnected if ID EEPROM not required. DO NOT USE these pins for anything other than attaching an I2C ID EEPROM. Leave unconnected if ID EEPROM not required.

These pins are reserved for ID EEPROM. DO NOT USE these pins for anything other than attaching an I2C ID EEPROM. Leave unconnected if ID EEPROM not required.
